BUTTE NEWS. THE CITY COUNCIL MEETS

Cable Line Matter Is Deferred for Three Days.

THE MAYOR TAKES A HAND

Consideration of Blackford's Reeigns tion - Mayor Harrington Votes Against Accepting It Report of Printing Committee.

not award the contract. I will enter tain a motion to award the contract."

There was still silence. No one made motion. "Then we will pass the mat-

er." said the mayor. The report of the street and alley

for the construction of a sewer and cul-

vert be granted, and we recommend that a resolution be passed for the

"Second-We recommend that the

ock 66; on lots 1 to 20 inclusive, block on lot 1, block 67.

"Fifth—We recommend that the ac-counts for the months of July and Au-

make the proper transfers on the books

The council took up the above report by sections. In regard to section 1, Alderman McArthur inquired of the city engineer what would probably be the

ost of the improvement.
"I cannot tell," said the engineer.

have made no estimate. The culvert will cost about \$1,500. The grading will

be very expensive. It will cost \$7,000 or \$8,000, and may be \$10,000."

"I don't think we can stand that ex-pense this fall," said Alderman Paige. "That's a good deal of money."

"But the property owners pay for it and they want it," said Alderman

grading and for all the culvert," sald Alderman McArthur.

On motion of Alderman McArthur the section was sent back to the com

tee to get the approximate cost of the proposed improvement.
Sections 2, 3 and 4 were adopted, and

section 5 was referred to the chairmen

The report of the judiciary commit-tee was as follows: "We recommend that the claim of Charles S. Passmore be rejected. In the matter of the claim

of Peoples & Connolly, we recommend that a warrant be drawn for \$15 to sat-

isfy said claim. We ask for further time in which to consider C. B. No. 32

We recommend that a substitute bill for C. B. No. 36 be considered, section

The report was adopted with the exception of the Moulton Water company's franchise, which was deferred to the next meeting, and the proposed settlement of the Wade estate diffi-

cuity, which was rejected.

The reports of the license, paving,

sewer, fire and water and finance com-mittees were adopted, the reports all

being of little importance.
A communication from the members-

of the fire department was received, asking that their salaries be increased

from \$90 to \$100 per month, the same as policemen. This was referred to the

water company stated that he had placed water mains on Oregon avenue at Iron and at Aluminum streets. A li-

cense to conduct an intelligence office

was granted to H. S. Ludington. The bonds of P. J. Whitty, T. J. O'Leary

granted Dr. W. M. Shultz. The coun-cil adjourned to Saturday evening.

Composition of Klondyke Cocktail.

The Klondyke cocktail has made its appearance in town. To be in keeping

with the winter climate, which is about start in, while we are still broiling in

this region, it is a pretty hot affair, fitter

zone of ours. This is the way the in-

ventor of the Klondyke cektail, who re-

fuses to give his name from fear of lynching, makes the concoction: A tea-

spoonful of Kirsh, a teaspoonful of peach

brandy, a teaspoonful of Curacea, a pinch

of red pepper, a pinch of sugar, a drop of

oil of peppermint, a lot of shaved ice, Garnish with an orange peel and serve in

a regular cocktail glass. A baked oyster

Composers, as a rule, have been re-

gust of the street and alley departm against the other departments of the city be allowed as herewith submitted, and that the city clerk be instructed to

of the city.

mmittee was as follows:
'We recommend that the petition of

street to Excelsior avenue and

There was not much accomplished in regard to the cable line at the council meeting last night except to talk about it. It looked for a time as though the thing was settled, but the mayor took a hand in the controversy and as a consequence the matter is deferred for three days longer.

The communication of Superintendent Wharton, as already published, was read. Mr. Wharton asked the privilege with the wear-resisting qualities, of the floor and made another proposition. It was that the line be abandoned until June 20 next; that the cable track be torn out from Copper street to the terminus and the street railway company fill up the space with plank until next spring, when the track would be aid and the company pave between its tracks. Mr. Wharton said he was sorry that it is impossible for the company to put in its track and pave now. He had corresponded with the Pittsburg. Illinois and Pueblo steel works, but had failed to get any guarantee that the yokes, supports and rails could be delivered before 96 days' time.

The coupeil considered this matter in

The council considered this matter in committee of the whole, with Alderman Knowlton in the chair. Alderman Bausman moved that this last proposition of Mr. Wharton be accepted. Alderman Rowan wanted to know how the company would plant up its tracks the company could plank up its tracks when its tracks are in some places way above the grade. Mr. Wharton said that the entire track would be torn up

that the entire track would be torn up and the planking be done on a level with the pavement.

Alderman McArthur moved that the third proposition in Mr. Wharton's written communication be accepted, namely, to tear up below Copper street without any provision for paving temporarily with plank.

Mayor Harrington considered this

Mayor Harrington considered this mayor Harrington considered this the most sensible proposition. "We want the line," he said, "removed from the street entirely. When it is removed we will insist on their complying with the terms of the franchise before they get back on the street. If they wish to retain their franchise they must have get back on the street. If they wish to retain their franchise they must pave as required by the franchise. That is what we should insist on. We served notice on them to pave within seven days. They have not done so. Now, if they won't pave, let us do it and let them forfeit their franchise. It is my experience in this council that this company is always asking for something from the city and never doing anything for the city."

Alderman Paige said the street railroad company has had ample time to get its material. There are no strikes in the iron mills and there are no railroad strikes. He scouted the idea that the coal strike prevents the company

road strikes. He scouted the idea that the coal strike prevents the company from getting its rails until next year.

On McArthur's motion to accept the third proposition the vote was as follows: Ayes—Dorais, Ljubibratich, McArthur, Rowan, 4: noes—Bausman, Bryant, Cannon, Leggat, Melcher, Muntzer, Paige, 7. The committee of the whole accepted the new proposition of Mr. Wharton to tear up the tracks below Copper street and pave temporarily with planks. The committee of the whole made this report to the council.

The mayor called for the reading of the company's franchise with the re-quirement for the company to pave be-tween tracks with the penalty of for-feiture of franchise if it fails to comfetture of franchise if it fails to com-ply. He also called for the reading of the resolution passed at the last coun-eil meeting, notifying the company to do its paving within seven days. The chair then ruled Bausman's motion for the acceptance of Wharton's last proposition out of order. On motion of Mr. Knowlton the company was allowed

three more days or until Saturday night to comply with the demand.

The resignation of Mr. Blackford as city engineer was then read to the council. Alderman Bausman moved that the resignation be not accepted. He said that it is very essential that Mr. Blackford be not removed from the work of the city at present. He ought to be in charge of the work which was started under his direction.

"What good will it do not to accept his resignation if he is bound to re-sign?" asked one of the aldermen.

"Mr. Blackford will not insist on his resignation," said Mr. Bausman. "He will not leave the city in the lurch if the council does not want him to re-

Mr. Blackford said that when he put in his resignation he expected that it would be accepted, but the press had taken up the matter and urged a com-promise. He did not want to go before the people as leaving the city at a time when his services might be deemed essential. His personal preference was that the resignation be accepted. The vote then came on Alderman Baus-man's motion that the resignation be not accepted. There was a general re-luctance to vote, as the aldermen did not like to take sides in the little difficulty between the mayor and the city engineer. Alderman Melcher refused to vote, and Alderman Knowlton hesitated a long time, voted yea and then voted no. The vote on Bausman's motion was as follows: Ayes—Bausman, Can-non, Leggat, Ljubibratich, Rowan—5. Noes—Bryant, Dorais, Knowlton, Mc-

Arthur, Muntzer, Paige—6.
As four aldermen were absent and one refused to vote, there was not really a majority of the council either way. The mayor then did a graceful little thing. He said: "It requires nine votes to confirm an appointment, and I shall rule that it also requires nine votes to accept a resignation. As there are only six votes for accepting the resignation, I shall declare Mr. Blackford's resigna-

tion not accepted."

There was applause from the specta-

ee was brought from its dusty pigeon ole, but when it was read it was found to be changed. The committee had at first recommended that the printing of ordinances be awarded the Miner, and the furnishing of job work and supplies be awarded the Inter Mountain. The Miner kicked on this, claiming its bid to be the lowest on most things. Some way the report got pigeon-holed about three weeks ago. Last night a new re-port was presented, awarding the whole work to the Inter Mountain for the ensuing year. The report was signed by Aldermen Cannen, Davey and Do-

"I want to know if that is the lowest asked Alderman Knowlton, after the reading of this report.
"Both claimed to be the lowest," re-

plied Alderman Cannon. "This was the nly report we could agree on."
"But we want to know which bid was Cor. Cain and Broadway, BUTTE, CONT. But we want to know which bid was the lowest," said Alderman Bausman, thoven, 57; Meyerbeer, 79.

"I don't know," repeated Alderman Cannon. "Both claimed to be the lowest. This is our report, and it is before you to do with as you please." On motion of Leggat the report was adopted by a scattering vote of ayes and need.

adopted by a scattering vote of ayes and noes.

There was then a painful silence.
"A motion to award the contract is now in order," said the mayor.

There was more silence.
"Gentlemen, you have not awarded the contract," ruled the mayor. "The adoption of the committee's report does not award the contract. I will enter-Claimed That a Second Anaconda Has Been Discovered.

IT IS IN MADISON COUNTY

Several Claims Bonded Situated Near Red Bluff-Lease to the Silver Crown Mining Company - Contract to Sink the Shaft Still Further.

W. E. Burgess and others for the grad-ing of West Galena street from Wash-The report of what indicates a great copper strike in Madison county was brought to Butte yesterday and if the discovery is what it is claimed to be the report will be good news to the people of that part of the state. About three months ago John W. Coughlan, city engineer be instructed to have mended those permanent sidewalks which have been torn up by the paving of Main street and which are on grade, and to have placed on grade those which are not on grade. cashier of the Mountain Con office in Butte; Richard J. Dywer, manager for Pat Mullins, and John S. McGroarty, superintendent of the electric light, railway and townsite company of Anawhich are not on grade.

"Third—We recommend that a permanent sidewalk be placed in front of the Forbis block on East Broadway.

"Fourth—We recommend that the following wooden sidewalks be laid: On lot 16, block 35; on lots 1 to 16 inclusive, block as the state of the late of the late." on the group of mining claims in Madison county known as the Bluff prop-erty, owned by Thomas Bluff, William Lamb, Jane Bluff and Thomas S. Bay-

The bonded claims are the Copper Belle, Populist, Silver Crown, Manhattan and George Washington, and are located on the Madison river, about four miles from Norris and two and a half miles from Red Bluff. The leas res organized themselves into the Silver Crown Mining company and for three months have been prosecuting development work on the properties. Shortly after commencing work they uncovered a lead-silver ledge, but at about a depth of 15 feet the ledge scattered. They then sunk on the vein with the hope of striking the lost ledge and in doing so uncovered the hanging wall of a copper vein and then drifted 35 feet before reaching the footwall. feet before reaching the footwall.

The ledge matter shows three feet of copper tale on both wails and the intervening strata is good lead matter, thoroughly mineralized. The discovery is claimed to be the first of the extent in Madison county where pyrites of copper shows at a depth of 35 feet, and the leasers have faith in their represents that it will some day

35 feet, and the leasers have faith in their property that it will some day develop into a second Anaconda, and especially as the indications so far are alleged to be identical with the early showings of the great Anaconda property. The copper pyrites taken from the discovery assay 20 per cent. copper, 12 per cent. silver and 38 in gold. A contract has been let to sink 150 feet from the present 35-foot level and at that depth the expectant leasers hope to have their greatest hopes realized. to have their greatest hopes realized. Mr. Coughlan and Pat Mullins own all the adjoining claims for a distance

HUMAN HAIR IMPORTED

Tons of It Come to America From Continental European Countries.

for C. B. No. 36 be considered, section by section, in committee of the whole. We recommend that C. B. No. 34 be passed and published. We recommend that no action be taken on the communication of J. Robinson Hughes in regard to the assistant city treasurer; that the claim of L. P. Miller be rejected. We further recommend that the proposition for compromise of the proposition for compromise of the proposition of the commend that the proposition for compromise of the proposition of the proposition for compromise of the proposition of the propos om the Washington Star. Perhaps there is no staple article about which less is known to the ave-rage person than human hair as an article of commerce. It will doubtless surprise many when it is stated that the dealers in human hair goods do not depend on chance clippings here and there, but that there is a regular hair harvest that can always be relied upon. It is estimated that over 12,000,000 pounds of human hair are used annualthe proposition for compromise of O. M. Hall, attorney for James A. Murray, be accepted, and the action of Murray vs. the city of Butte, now pending in the district court, be disly in the civilized world for adorning the heads of women. In New York city alone over four tons of this class

of goods are imported yearly.

"Not a little of the hair used in this country," said a New York dealer to the writer, "comes from the heads of American women and is fully as fine in shade and texture as the imported article. We had a big harvest during the craze that the fair sex had not long o for having th Many thousands of women who then had their locks sheared have since bitterly regretted it, as in many in-stances their hair has grown so slowly that they have been compelled to wear a wig or a switch since the fashion changed. After the majority of wo-men reach the age of 30 the hair seems to partially lose its vigor, and if cut it will not grow long again. "Two-thirds of the ladies nowadays

Petitions from residents of the Hope and Volunteer additions, asking for a water main and fire plugs; from residents of the First ward, asking for the opening of Gagnon street east to Pennsylvania avenue and Wyoming street; Joseph A Hyde, proprietor of the Lizzie block, kicking against the breaking of his sidewalk by the paving contractors; from residents of East Broadway, asking that the water mains be extended from Grant street to Warren avenue, from G. M. Hall, attorney use false hair more or less. The decree of fashion, or the desire to conceal a defect or heighten a charm, is the reason, of course. One woman, for in-stance, has a high forehead and wishes to reduce it in appearance. Another has worn off the front hair by continued frizzing, and would like to con-ceal the fact. Both make use of a front or top piece, with a choice of many styles.

"Ladies' wigs cost from \$20 to \$200. Half wigs, top pieces and switches, from \$10 to \$50, according to quality. "The largest supply of hair comes from Switzerland, Germany and the French provinces. There is a human

hair market in Merlans, in the department of the lower Pyrenees, held every Friday. Hundreds of hair traders walk up and down the one street of the village, their shears dangling from their belts, and inspect the braids which the peasant girls, standing on the seteps of the houses, let down for inspection. If a bargain is struck the hair is cut, and the money paid on the spot, the price varying from 60 cents to \$5 in our money.

"A woman's hair may grow to the length of six feet. And I know a lady who has been offered and refused \$500 for her crown of glory, which is over six feet long. A single female hair will bear up a weight of four ounces with-out breaking, but the hair thus heavily weighted must be dark brown, for blonde hair breaks under a strain of two and one-half ounces. There are some 2,000 importers, manufacturers and dealers in human hair in the Unit-

and W. G. Pfouts were approved. A leave of absence to go hunting was SOME CAUSES OF LONGEVITY. More Old People Found in Agricultural Places Than in Cities.

A German statistician who has made longevity statistics the special subject of careful researches recently published the result of his investigations in an in-teresting article. On account of the difficulty of obtaining full data in regard to the conditions surrounding each case of longevity on record, the deductions as to the causes favorable or unfavorable to longevity are necessarily hypotherical. The figures obtained by the statistician seem to indicate, however, that climate and the degree of cit llization are among the most important factors influencing longevity. More people of over 100 years are found in the mild zone of Southern Europe than in the higher latitudes, with the and severe winters. In countries with highly developed civilization compar atively fewer cases of longevity are found than in more primitive countries. The statistics also show that in agrimarkably long lived. Handel was 74 years cultural countries the percentage of people over 100 years old is greater than countries principally devoted to industries. Some of the are, indeed, surprising. According to the last census the Ger-man empire has a population of about

50,000,000. Among them there are only 78 who have passed the hundredth year. France, with a population of barely 60,000,000, can boast of 213 persons who have celebrated their centennial in good health. The figures in regard to Great Britain are very interesting and significant. Of persons who have passed the century mark there are in England 166, in Ireland 578, and in Scotland only 46. Another peculiar fact is the unequal distribution of longevity in the Scandinavian peninsula. Sweden has only 10 centenarians, while rugged Norway, with a population of only about 10,000,000, can boast of 23 people who have lived over five score of years. There is but five centenarians in the industrial bee hive of Beigium, only two in

trial bee hive of Belgium, only two in sea-girt Denmark and not a single one in Switzerland, with its snow-clad Figures from Russia, Austria and

Italy could not be obtained. For Russia no census has ever been taken, and data as to the age of individuals are unreliable in that country, unless they are based upon official researches. Such cases could, of course, not enable a statistician to use them as a foundation for any comparison. In and Italy local censuses have been made, but they were mostly confined to cities and certain industrial districts, and no complete figures could be ob-

The most astonishing figures are fur-

nished by the South of Europe. Spain, with a population of about 18,000,000, has 401 people over 100 years of age. Even more favorable to longevity the climate of the Balkans seems to be Servia, with a total population of about 2.250,000, has no less than 575 people who have passed the century mark; Roumania, with a population of 5,800,000, 1,084, and Bulgaria, with a population of 3,300,000, even 3,883. In one year (1882) there were 350 persons of more than 100 years included in the mortality reports of Buigaria. In the minute kingdom of Servia there were, according to the census of 1892, 290 persons between 106 and 115 years of age, 153 between 115 and 125 years, 18 between 125 and 135 and 3 between 135 and 140.

The question, who is the oldest person in the world? has often been asked. and every now and then some claim in that respect is set up in favor of some individual of uncertain age. A few years ago a report went through the continental press of Europe saying that in Russia a man had been found who had reached the ripe old age of 160 years. However, no proofs were given for that assertion. According to the researches of the German statistician, the oldest person in the world, whose

has been proved beyond a doubt, is Bruno Cotrim, a negro, who was born in Africa 150 years ago and now lives in Rio de Janeiro. Next comes a coachman in Moscow, with 140 years to his authentically established record. The oldest woman in the world is 130 years old, but does not want to have her name mentioned, because she thinks that there are many older women in this world, who might feel of-fended if the palm were awarded to

BOUND TO HAVE A PRESCRIPTION. The Doctor Could Not Otherwise 5 An Anxious Mother.

From the Washington Star.
"While it is true that a physician seer much of the sadness which is the lot of the human race," said a doctor of this experiences which are very amusing. I am reminded of this by a call I recently had to the home of a lady who was en-joying the society of her first born, aged 4 months. I was sent for hurriedly and went prepared to treat any maindy incident to childhood. The other, on my arrival, was almost hysterics, but striving to remain calm. She took me to the bed, pointed to the sleeping child, but said nothing. The baby appeared to be in excellent health and resting comfortably. I looked up to inquire the cause of her alarm and she whispered: 'Don't you see it—its head?'

The child's head appeared to be all

"I could scarcely refrain from smil-ing, for she evidently felt alarm because there was a gentle pulse on top of the child's head, a thing common and necessary to infant life. I endeav-ored to explain that an infant's skull is not hard and composed entirely of bone like that of an adult, but that a portion of it remains soft to allow for growth and expansion. She would have none of it. The child, she imagined, had had an accident or was suffering from some dreadful disease. I saw that it was useless to remonstrate and said I would give her a prescription. It was aqua pura, one teaspoonful every three hours, and I presume she is still giving it to the child."

The Menning of Names.

There are lots of people whose opinions is to the origin and meaning of names is entirely erroneous. Thus, instead of Smith being derived from blacksmith, ironsmith or anything of the kind, it really means "the man who smiths." our mill and maul, and means a "mauter or "fighter." Bacon is from the high German verb bagan, "to fight," means "the fighter:" Pigg and Bigg are from the same source, the German pich-an, "to slash." Hogg is the Anglo-Saxon hyge, "scholar." Tanner is the German "Thanger." The old German "Done-gand." meaning the "Dane-Goth." "Ringer is the Anglo-Saxon "Wringgar," or "the mailed warrior." In fact, a better research will speedily convince one that there is more in names than most people imagine.

Obsolete Laws of Virginia. In the statute books of Virginia a century ago many laws may be found ded to silence idle tongues. One reads; Whereas, oftentimes many babbling women slander and scandalize their neighbors, for which their poor husbands are often brought into chargable and vexatious suits and cast in great demages, therefore, be it enacted that all women found guilty be sentended to duck-
